PROTECTION PLEXIGLAS PANELS FOR SOCIAL DISTANCE PRESCRIPTION

FEATURES

USE

- Safe Screen is a system to **shield** and protect customers and operators where it is not possible to maintain a safe distance between people
- A functional solution, visually low impact and designed to be easily accessible. Safe Screen is the most suitable system for the protection of people in public places, offices, commercial activities and production plants.

TECHNICAL FEATURES

- Durable, impact-resistant and unbreakable high quality plexiglas panel with high transparency measures **80x h 50 cm**, easy to clean and sanitize
- Iron feet for free-standing support, option in white or black color, guarantees stability to the product without the need to fix it, removable for easy storage and cleaning
- The joint will keep the plexiglas panel raised by 2 cm, to allow the passage of sheets and documents

MADE IN ITALY

- Designed and produced by TIS srl - It is possible to make changes in measurements if necessary by contacting us before purchasing;
- **Self-supporting structure**, cross interlocking assembly, simple and fast
- Product supplied with instructions in packing with anti-break protections
- NO tools required for the assembly
- Covid-19 safety device
- Already available in stock
